TITLE 1

Trade co-operation

Article 1

In the field of trade co-operation, the object of this Convention is to promote trade between the Contracting Parties,
taking account of their respective levels of development, and, in particular, of the need to secure additional benefits
for the trade of ACP States, in order to accelerate the rate of growth of their trade and improve the conditions of
access of their products to the market of the European Economic Community, (hereinafter called the "Community"
so as to ensure a better balance in the trade of the Contracting Parties. To this end the Contracting Parties shall
apply Chapters 1 and 2 of this Title.

CHAPTER 1

Trade arrangements

Article 2

1. Products originating in the ACP States shall be imported into the Community free of customs duties and charges
having equivalent effect, but the treatment applied to these products may not be more favourable than that applied
by the Member States among themselves.

For the purpose of the first subparagraph the transitional provisions in force relating to the residual customs duties
and charges having equivalent effect resulting from the application of Articles 32 and 36 of the Act concerning the
Conditions of Accession and the Adjustments to the Treaties shall have no application.

2. (a) Products originating in the ACP States:

(i) those products shall be imported free of customs duties for which Community provisions in force at the time of
importation do not provide, apart from customs duties, for the application of any other measure relating to their
importation;

(ii) for products other than those referred to under (i), the Community shall take the necessary measures to ensure,
as a general rule, more favourable treatment than the general treatment applicable to the same products originating
in third countries to which the most-favoured-nation clause applies.

(b) These arrangements shall enter into force at the same time as this Convention and shall remain applicable for its
duration.
If, however, during the application of this Convention, the Community,

--subjects one or more products to common organization of the market or to specific rules introduced as a result of the implementation of the common agricultural policy, it reserves the right to adopt the import treatment for these products originating in the ACP States, following consultations within the Council of Ministers. In such cases, paragraph 2 (a) shall be applicable;

--modifies the common organization of the market in a particular product or the specific rules introduced as a result of the implementation of the common agricultural policy, it reserves the right to modify the arrangements laid down for products originating in the ACP States, following consultations within the Council of Ministers. In such cases, the Community undertakes to ensure that products originating in the ACP States continue to enjoy an advantage comparable to that previously enjoyed in relation to products originating in third countries benefiting from the most-favoured-nation clause.

Article 3

1. The Community shall not apply to imports of products originating in the ACP States any quantitative restrictions or measures having equivalent effect other than those which the Member States apply among themselves.

2. Paragraph 1, however, shall not prejudice the import treatment applied to the products referred to in the first indent of Article 2 (2) (a). The Community shall inform the ACP States when residual quantitative restrictions are eliminated in respect of any of these products.

3. This Article shall not prejudice the treatment that the Community applies to certain products in implementation of world commodity agreements to which the Community and the ACP States concerned are signatory.

Article 4

Nothing in this Convention shall preclude prohibitions or restrictions on imports, exports or goods in transit justified on grounds of public morality, public order or public security; the protection of health and life of humans, animals and plants; the protection of national treasures possessing artistic, historic or archaeological value or the protection of industrial and commercial property. Such prohibitions or restrictions shall not, however, constitute a means of arbitrary discrimination or a disguised restriction on trade.

Article 5

Where new measures or measures stipulated in programmes adopted by the Community for the approximation of laws and regulations in order to facilitate the movement of goods are likely to affect the interests of one or more ACP States the Community shall, prior to adopting such measures, inform the ACP States thereof through the Council of Ministers. In order to enable the Community to take into consideration the interests of the ACP States concerned, consultations shall be held upon the request of the latter with a view to reaching a satisfactory solution.

Article 6

Where existing rules or regulations of the Community adopted in order to facilitate the movement of goods or where the interpretation, application or administration thereof affect the interests of one or more ACP States, consultations shall be held at the request of the latter with a view to reaching a satisfactory solution. With a view to finding a satisfactory solution, the ACP States may also bring up within the Council of Ministers any other problems relating to the movement of goods which might result from measures taken or to be taken by the Member States. The competent institutions of the Community shall to the greatest possible extent inform the Council of Ministers of such measures.

Article 7

1. In view of their present development needs, the ACP States shall not be required, for the duration of this Convention, to assume, in respect of imports of products originating in the Community, obligations corresponding to the commitments entered into by the Community in respect of imports of the products originating in the ACP States, under this Chapter.

(a) In their trade with the Community, the ACP States shall not Discriminate among the Member States, and shall grant to the Community treatment no less favourable than the most-favoured-nation treatment.

(b) The most-favoured-nation treatment referred to in subparagraph (a) shall not apply in respect of trade or economic relations between ACP States or between one or more ACP States and other developing countries.

Article 8

Each Contracting Party shall communicate its customs tariff to the Council of Ministers within a period of three months following the entry into force of this Convention. It shall also communicate any subsequent amendments to that tariff as and when they occur.

Article 9

1. The concept of "originating products" for the purposes of implementing this Chapter, and the methods of administrative co-operation relating thereto, are laid down in Protocol No 1.

2. The Council of Ministers may adopt any amendment to Protocol No 1.

3. Where the concept of "originating products" has not yet been defined for a given product in implementation of paragraphs 1 or 2, each Contracting Party shall continue to apply its own rules.

Article 10

1. If, as a result of applying the provisions of this Chapter, serious disturbances occur in a sector of the economy of the Community or of one or more of its Member States, or jeopardise their external financial stability, or if difficulties arise which may result in a deterioration in a sector of the economy of a region of the Community, the latter may take, or may authorize the Member State concerned to take, the necessary safeguard measures. These measures and the methods of applying them shall be notified immediately to the Council of Ministers.

2. For the purpose of implementing paragraph 1, priority shall be given to such measures as would least disturb the trade relations between the Contracting Parties and the attainment of the objectives of the Convention. These measures shall not exceed the limits of what is strictly necessary to remedy the difficulties that have arisen.

Article 11
In order to ensure effective implementation of the provisions of this Convention in the field of trade co-operation, the Contracting Parties agree to inform and consult each other. Consultations shall take place, at the request of the Community or of the ACP States, in accordance with the conditions provided for in the rules of procedure in Article 74, particularly in the following cases:

Therefore, each programme may be reviewed whenever necessary during the period covered by this Convention.

5. These programmes shall not cover the exceptional aid referred to in Article 59 or the measures for stabilizing export earnings referred to in Title II.

Any participation by certain third countries in contracts financed by the Community must, however, be of an exceptional nature and be authorized case-by-case by the competent body of the Community, account being taken in particular of a desire to avoid excessive increases in the cost of projects attributable either to the distances involved and transport difficulties or to the delivery dates.

Participation by third countries may also be authorized where the Community participates in the financing of regional or interregional co-operation schemes involving third countries and in the joint financing of projects with other providers of funds.

Article 57

**TITLE I**

Definition of the concept of originating products

**Article 1**

1. For the purpose of implementing the Convention and without prejudice to paragraphs 3 and 4, the following products shall be considered as products originating in an ACP State, under the condition that they were transported directly, within the meaning of Article 5:

   (a) products wholly obtained in one or more ACP States,
   (b) products obtained in one or more ACP States in the manufacture of which products other than those referred to in (a) are used, provided that the said products have undergone sufficient working or processing within the meaning of Article 3.

2. For the purpose of implementing paragraph 1, the ACP States are considered as being one territory.

3. When products wholly obtained in the Community or in the countries and territories undergo working or processing in one or more ACP States, they shall be considered as having been wholly produced in that or those ACP States, under the condition that the products were transported directly within the meaning of Article 5.

4. Working and processing carried out in the Community or in the "countries and territories", shall be considered as having been carried out in one or more ACP States, when the final products undergo working or processing in one or more ACP States, under the condition that the products were transported directly within the meaning of Article 5.

5. For the purpose of implementing the previous paragraphs, and provided that all the conditions laid down in those paragraphs are fulfilled, the products obtained in one or more ACP States shall be considered as products originating in the ACP State where the last working processing took place. For this purpose the working or processing listed in Article 3 (3) (a), (b), (c) and (d) shall not be considered as working or processing, nor shall a combination of such working or of such processing.

6. The products in List C in Annex IV shall be temporarily excluded from the scope of this Protocol.

**Article 2**

The following shall be considered as wholly obtained either in one or more ACP States, in the Community or in the "countries and territories" within the meaning of Article 1 (1) (a) and (3): (a) mineral products extracted from their soil or from their seabed; (b) vegetable products harvested therein; (c) live animals born and raised therein; (d) products from live animals raised therein; (e) products obtained by hunting or fishing conducted therein;

(h) used articles collected there fit only for the recovery of raw materials;

(i) waste and scrap resulting from manufacturing operations conducted therein;

(j) goods produced there exclusively from products specified in subparagraphs (a) to (i).

**Article 3**
1. For the purpose of implementing Article 1 (1) (b) the following shall be considered as sufficient working or processing:

(a) working or processing as a result of which the goods obtained receive a classification under a tariff heading other than that covering each of the products worked or processed, except, however, working or processing specified in List A in Annex II, where the special provisions of that list apply;

(b) working or processing specified in List B in Annex III.

"Sections", "Chapters" and "tariff headings" shall mean the Sections, Chapters and headings in the Brussels Nomenclature for the Classification of Goods in Customs Tariffs.

3. For the purpose of implementing Article 3 (1) (a) the following shall always be considered as insufficient working or processing to confer the status of originating products, whether or not there is charge of tariff heading:

(f) simple assembly of parts of articles to constitute a complete article;

(g) a combination of two or more operations specified in subpara graphs

(a) to (f);

(b) slaughter of animals.

Article 4

Where the Lists A and B referred to in Article 3 provide that goods obtained in an ACP State shall be considered as originating therein only if the value of the products worked or processed does not exceed a given percentage of the value of the goods obtained, the values to be taken into consideration for such percentage shall be:

--on the one hand, as regards products whose importation can be proved: their customs value at the time of importation;

--as regards products of undetermined origin: the earliest ascertainable price paid for such products in the territory of the Contracting Party where manufacture takes place;

Interruptions or changes in the method of transport due to force majeure or consequent upon conditions at sea shall not affect the application of the preferential treatment laid down in this Protocol, provided that the goods have not, during these interruptions or changes, entered into commerce or been delivered for home use and have not undergone any operations other than those designed to preserve them in good condition.

2. Evidence that the conditions referred to in paragraph 1 have been fulfilled shall be supplied to the responsible customs authorities in the Community by the production of:

It shall be made out in one of the languages in which the Convention is drawn up and in accordance with the provisions of the domestic law of the exporting State. Article 23

In order to ensure the proper application of this Title, the Member States, the "countries and territories" and the ACP States shall assist each other, through their respective customs administrations, in checking the authenticity of movement certificates EUR.1 and the accuracy of the information concerning the actual origin of the products concerned and the declarations by exporters on forms EUR.2 and the authenticity and accuracy of the information certificates envisaged in Article 20.

ANNEX IX

Joint declarations

1. For the purposes of applying Article 5 (2) (c) of this Protocol, the certificate of sea transport, issued in the first port of embarkation shall be equivalent to the through bill of lading for products covered by movement certificates issued in landlocked ACP States.
2. Products exported from landlocked ACP States which are warehoused elsewhere than in the ACP States or the countries and territories referred to in explanatory note No 9 may be the subject of movement certificates issued under the circumstances referred to in Article 7 (2).

3. For the purpose of Article 7 (1) of this Protocol, certificate EUR I issued by a competent authority and endorsed by the Customs authorities will be accepted.

4. For the implementation of Article 27 of this Protocol, the Community is prepared to examine any request of the ACP States in order to bring derogations to this Protocol in favour of the industries concerned. This examination shall be held in an appropriate institutional framework, from the date of signature of the Convention, with a view to allowing the derogations to enter into force at the same date as the Convention.

5. In particular, account shall be taken on a case-by-case basis of the possibility of conferring originating status on products which include products originating in neighbouring developing countries or in developing countries with which one or more ACP States have special relationships, provided that satisfactory administrative cooperation can be established.

PROTOCOL N° 2

on the application of financial and technical co-operation

CHAPTER 1

Article I

In the context of the objectives laid down in Article 40 of the Convention, the Contracting Parties agree that the projects and programmes must help ensure all or part of the following effects:

--growth of the national income of each ACP State;
--improvement of the standard of living and the socio-cultural;
--levels of populations and of the most underprivileged in particular;
--the establishment of more balanced economic relations between the ACP States and other countries, their greater participation in world trade in general, including, in particular, trade in manufactured products;
--improvement and control of the conditions of development, in particular physical factors and technical know-how;
--diversification and integration of the structure of the economy on both a sectoral and a geographical basis;
--regional co-operation between ACP States and, where appropriate, between ACP countries and other developing countries.

Article 2

Upon expiry of the Convention, any monies provided for under the third indent of point I (a) of Article 42 of the Convention in the form of risk capital but not committed shall be added to those provided for in the form of special loans under the second indent of the same provision; monies provided for under Article 47 (2) of the Convention for financing regional projects, but not committed for that purpose, shall be made available for financing other projects and programmes.

CHAPTER 2

Methods of financing

Article 3

1. Special loans shall serve to finance all or part of projects or programmes of general interest to the economic and social development of the ACP State or ACP States on the territory of which they are to be undertaken.

2. As a general rule, these loans shall be made for a duration of 40 years, with a grace period of 10 years. They shall bear interest at the rate of 1% per year.

Article 4

1. In order to assist the execution of industrial, mining and tourism projects of general interest to the economy of the ACP States or ACP States concerned, the Community may grant assistance in the form of risk capital in order to step up the own resources or resources assimilated thereto, of those countries' firms, where appropriate by the acquisition of holdings in the authorised capital of those firms and, more generally, by means of quasi-capital aid.

2. Holdings acquired by the Community in the capital of firms or institutions for financing the development of the ACP States shall be in the nature of temporary minority holdings. Such operations may be undertaken jointly with a loan from the Bank or with another form of risk capital assistance. As soon as appropriate they shall be transferred, preferably to nationals or institutions of the ACP States.

3. Quasi-capital assistance may take the form of:

--subordinated loans, which shall be redeemed and in respect of which interest, if any, shall be paid only after the other bank claims have been settled on market terms;
--conditional loans, which shall be serviced and in respect of which redemption shall be due only after fulfilment of conditions laid down when the loan is made by particular reference to the conditions in which the project is being set up.

These conditions shall indicate that the project has overcome the particular risks to which it was exposed and has achieved a certain level of profitability.

The terms of such aid shall be determined on a case-by-case basis by reference to the characteristic of the projects financed; the interest rate may not be greater than that of subsidized loans from the Bank.

4. Quasi-capital assistance shall as a general rule be accorded to industrial, mining and tourism firms and to development financing institutions where the characteristics of their activities and management so permit. It may also be accorded to the ACP States in order to enable them to acquire a holding in the capital of industrial, mining...
and tourism firms where such an operation comes under the financing of new productive investments and is supplemented by another financial intervention by the Community.

Article 5

1. Scrutiny by the Bank of the eligibility of projects, and the acceding of loans from its own resources, shall be effected in concert with the ACP State or ACP States concerned and in accordance with the rules, conditions and procedures provided for in the Bank’s Statute, consideration being given to the economic and financial situation of the ACP State or ACP States concerned and to the factors which guarantee the servicing of repayable aid.

2. The duration of loans made by the Bank from its own resources shall be governed by terms stipulated on the basis of the economic and financial characteristics of the project; this period may not exceed 25 years.

3. The rate of interest shall be the rate charged by the Bank at the time of the signature of each loan contract. This rate shall generally be reduced by 3 % by means of an interest rate subsidy, except where the loans are intended for investment in the oil sector, wherever these are located, or in the mining sector, unless in the latter case they are situated in one of the least developed States listed in Article 48 of the Convention, or are situated in countries or concern sectors which will be defined at the first meeting of the Council of Ministers. This interest rate subsidy shall, however, be automatically adjusted so that the interest rate actually borne by the borrower will be neither less than 5% nor more than 8%.

4. The aggregate amount of interest rate subsidies, calculated in terms of its value at the time of the signature of the loan contract at a rate and according to rules to be laid down by the Community, shall be charged against the amount of grant aid specified in the first indent of point 1 (a) of Article 42 of the Convention and shall be paid directly to the Bank.

CHAPTER 3

Technical Co-operation

Article 6

1. The technical co-operation referred to in Article 46 of the Convention may be either linked with investments or of a general nature.

2. Technical co-operation linked with investments comprises:
   (a) planning and special and regional development studies;
   (b) technical, economic and commercial studies, and research and surveys required to prepare projects;
   (c) aid in the preparation of dossiers;
   (d) aid in the execution and supervision of work;
   (e) temporary aid for the establishment, launching and operation of a specific investment or of installations, including where necessary the training of personnel for the operation and maintenance of the investment or installations;
   (f) meeting the cost of technicians temporarily and providing goods necessary to the proper execution of an investment project.

3. General technical co-operation comprises:
   (a) the grant of scholarships for studies, training courses and postal tuition to provide, preferably in the ACP States, for the vocational training and further training of the nationals thereof;
   (b) the organization of specific training programmes in the ACP States, in particular for the staff of public services and institutions of the ACP States or of undertakings therein;
   (c) at the request of the ACP States, the provision of experts, advisers, technicians and instructors of the Member States or the ACP States, for specific missions and for limited periods;
   (d) the supply of instructional, experimental and demonstration equipment;
   (e) the organization of short training courses for nationals of the ACP States and further training courses for civil servants of those States;
   (f) sectoral studies;
   (g) studies of the prospects and opportunities for economic development and diversification in the ACP States, and of problems of interest to groups of ACP States or to the ACP States as a whole;
   (h) general information and documentation to promote the economic and social development of the ACP States, the development of trade between the Community and those States, and the achievement of the aims of financial and technical co-operation.

CHAPTER 4

Regional Co-operation

Article 7

1. Within the meaning of the Convention, regional co-operation shall apply to relations either between two or more ACP States between one or more ACP States on the one hand and one or more neighbouring non-ACP countries on the other. Intergovernmental co-operation shall apply to relations either between two or more regional organizations of which ACP States form part or between one or more ACP States and a regional organization.

2. Within the meaning of the Convention, regional projects are those which help directly to solve a development problem common to two or more countries through joint schemes or co-ordinated national schemes.

Article 8

The field of application of regional and interregional co-operation shall include:
   (a) the distribution of industries with the aim of accelerating the industrialization of the ACP States, including the setting up of regional and interregional enterprises;
   (b) transport and communications: roads, railways, air and sea transport, inland waterways, postal services and telecommunications;
   (c) the production of energy and joint exploitation of natural resources;
   (d) research and technology applied to intensifying regional and interregional co-operation;
   (e) stockbreeding, agriculture, industry and the promotion of products of these sectors;
(f) education and training, including the establishment of joint institutions of advanced technology, in the context of training programmes to enable nationals to participate fully in economic development;

(g) co-operation in travel and tourism, including the establishment of tourist promotion centres or the strengthening of existing ones on a regional basis in order to increase international and regional tourism;

(h) technical assistance for the establishment of regional co-operation bodies or the development of new activities in existing regional bodies.

Article 9

An ACP State or group of ACP States participating with neighbouring non-ACP countries in a regional or interregional project may request the Community to finance that part of the project for which it is responsible.

CHAPTER 5

Special measures in favour of the least developed ACP States

Article 10

Community aid accorded to the ACP States listed in Article 1 of the Convention shall be combined with particularly favourable terms of financing, having regard to the economic situation specific to each ACP State.

Generally, such financing shall be in the form of grants and, appropriate cases, in the form of special loans or risk capital. However, loans from the Bank's own resources may be accorded in the States concerned, having regard to the criteria defined in Article of the Convention.

Article 11

1. At the request of the least developed ACP States the Community shall give special attention to the application of the following aid measures:

   (a) technical assistance necessary for identifying, preparing and carrying out their projects which come within the framework of the programming of Community aid;

   (b) training schemes for management and other staff required for the economic development services and technical departments of those States. Such training must be closely linked to the practical objectives set by the State concerned and carried out, as far as possible, in the territory of that State.

2. The following special aid measures may also be applied to the States:

   (a) support for research aimed at finding solutions to some of the specific economic and social development problems;

   (b) support for the development of small and medium-sized enterprises and for carrying out small rural development schemes.

3. By way of derogation from Article 46 (2) of the Convention on the basis of an examination of the needs and means of each the ACP States concerned, the Community may finance, temporarily and on a diminishing scale, the running costs of or major repay to investments previously financed by the Community which are special importance to the economic and social development of the State concerned. This aid shall be accorded only where such expenditure on running costs or major repairs proves too great for the State or other beneficiaries.

Article 12

The least developed ACP States shall have a priority claim to the measures for the promotion of regional co-operation specified in Article 47 of the Convention.

CHAPTER 6

Specific measures in favour of small and medium-sized national firms

1. Within the limits of the resources provided for in Article 42 of the Convention, the Community shall finance projects in favour of small and medium-sized firms co-operatives or local authorities in the ACP States and shall generally do so through public or semipublic financial bodies specialized in development, such as national or regional development banks approved by the Community and the ACP State or ACP States concerned.

   --To this end, the ACP State or ACP States concerned shall provide the Community with:

   --information on the capacity of the financing body, on the trend of and prospects for its activities in the field in question, and on the guarantees it can offer;

   --a programme for the promotion of small firms, indicating in particular the scope and nature of the projects, financing requirements, the existence of possible promoters and, where appropriate, the technical assistance the latter are to be provided with for the preparation and management of their projects.

3. When the Community has approved the programme in accordance with Article 54 of the Convention, it shall open for the approved financial body a line of credit financed by a suitable form of aid.

   The line of credit shall be for a maximum amount of 2 million units of account, which may be used during a limited period of not more than three years. It may be renewed at the end of that period.

4. The terms governing the grant of such aid shall in each case be the subject of an agreement between the Community and the financing body. The outline rules for the implementation of the aid shall be stipulated therein, in particular as regards:

   --the scale of the operations, which may not exceed an amount in the order of 200,000 units of account per project;

   --the sectors eligible for aid;

   --the criteria which must be met by the potential aid recipients; --the criteria and methods of project appraisal;

   --the financial terms of final loans.

5. The projects shall be appraised by the financing body. This body shall decide, on its own financial responsibility, on final loans to be accorded on terms established by reference to those obtaining for this type of operation in the

http://www.acpsec.org/en/conventions/1ome1.htm
ACP State in question.

6. The financing body shall finance its loans by mobilizing the line of credit to the extent required. At this stage the Community shall verify that the loans fall within the agreement referred to in paragraph 4. The financing terms accorded by the Community to the financing body shall take into consideration the latter's need to cover its administrative costs, exchange and financial risks and the cost of technical assistance given to the firms or final borrowers.

7. The financing body shall be responsible, whatever the circumstances, for repayment to the Community of that part of the line of credit actually mobilised. It shall provide the Community annually with a report on the implementation and financing of the approved programme.

CHAPTER 7
Microprojects

Article 14
1. In order to respond concretely to the needs of local communities with regard to development, the Fund shall participate as an experiment in the financing of microprojects, without prejudice to the range of projects which ACP States may include in their national programmes for financing by the Fund. To this end, a sum of 20 million units of account, to be deducted from the grant aid provided for in the first indent of point 1 (a) of Article 42 of the Convention, may be used to cover commitments relating to this type of scheme.

2. At the end of the second year after the entry into force of the Convention, the Council of Ministers shall decide on the follow-up to this experiment.

Article 15
1. In order to be eligible for Community financing, microprojects must:
   --meet a real, priority need at local level;
   --ensure the active participation of the local community.
   The Fund's contribution to each microproject may not exceed 75,000 units of account.

2. Microprojects shall normally be carried out in rural areas. However, the Community may also assist in the financing of microprojects in urban areas. These projects shall include dams, wells and water supply systems, silos and warehouses for storing provisions and crops, rural service tracks and bridges, animal vaccination pens and corridors, primary schools, dispensaries, maternity homes, social assistance centres, market buildings and facilities to encourage commercial and industrial activity, and other projects which meet the criteria referred to in paragraph 1.

Article 16
Each project for which Community assistance is requested must stem from an initiative taken by the local community which will benefit therefrom.

The financing of microprojects shall in principle have a tripartite, structure and shall stem from:
   --the community benefiting, in the form of a contribution in money or in kind adapted to its capacity to contribute;
   --the ACP State, in the form of a financial contribution or a contribution of public works services;
   --the Fund.

For each project, the local community shall undertake to play its part in maintaining and running the project, in conjunction with the national authorities as appropriate.

Article 17
1. The ACP State concerned shall prepare and submit to the Commission an annual programme setting forth the broad outlines of the projects planned. After examination by the Commission's departments, these programmes shall be submitted to the relevant bodies of the Community for financing decisions in accordance with Article 54 of the Convention.

2. Within the framework of the annual programmes thus drawn up the financing decisions relating to each microproject shall be taken by the ACP State concerned, with the agreement of the Commission which shall be deemed to be given within one month of notification of such decision, except in special cases.

CHAPTER 8
Competition and terms of preference for national firms

Article 18
1. The Commission and the relevant authorities of the ACP State shall take the necessary implementing measures to ensure equality of conditions for participation in tendering procedures and other procedures for the award of contracts financed by the Fund's resources managed by the Commission.

2. To this end, without prejudice to Article 19, care shall be taken in particular to:
   (a) ensure advance publication in reasonable time of invitations to tender in the Official Journal of the European Communities and the official journals of the ACP States;
   (b) eliminate any discriminatory practice or technical specification liable to stand in the way of participation on equal terms by all natural or legal persons of the Member States and ACP States;
   (c) encourage in so far as possible, especially where major works or those of a particular technical nature are to be undertaken, co-operation between the firms of the Member States and of the ACP States for example by means of preselection and the creation of groups.

Article 19
For certain operations relating to exceptional aid, and for other operations where the urgency of the situation is recognized or where the nature, minor importance or particular characteristics of certain works or supplies so warrant, the relevant authorities of the ACP States may, in agreement with the Commission, exceptionally authorize:
Lomé Convention

---

Delegate of the European Commission referred to in Article 31 (hereinafter called the “Delegate”).

The appropriate authorities of the ACP States, in participation and agreement with the Commission, shall prepare, negotiate and conclude the technical co-operation contracts. These contracts shall be prepared, negotiated and concluded by the appropriate authorities of the ACP States, in participation and agreement with the Commission. The technical co-operation contracts shall be prepared, negotiated and concluded by the appropriate authorities of the ACP States, in participation and agreement with the Commission.

In the context of the common rules provided for in Article 22 and the general conditions of payment established by the Fund, the technical co-operation contracts shall be prepared, negotiated and concluded by the appropriate authorities of the ACP States. The technical co-operation contracts shall be prepared, negotiated and concluded by the appropriate authorities of the ACP States.

Article 20
To promote participation by national firms in the performance of contracts financed by the Community from the Fund's resources managed by the Commission:

(a) An accelerated procedure for issuing invitations to tender involving shorter time-limits for the submission of tenders shall be used where the works in question, because of their scale, are mainly of interest to firms of the ACP States. This accelerated procedure shall be applied to invitations to tender whose value is estimated at less than 2 million units of account. It may be used only for works contracts and shall involve, for the submission of tenders, time-limits fixed in accordance with the rules in force in the ACP State concerned. The use of an accelerated procedure for invitation to tender whose value is less than 2 million units of account shall not exclude the possibility of the Commissions proposing an international invitation to tender to the authorities of the ACP State for agreement where the works in question, because of their specialized nature, might be of interest to international competition.

(b) For the execution of works whose value is less than 2 million units of account a 10% preference shall be taken into account in favour of firms of the ACP States where tenders of equivalent economic and technical quality are compared. This preference shall be confined to national firms of the ACP States within the meaning of the national laws of those States provided that their residence for tax purposes and main business are established in an ACP State and that a significant share of the capital and management staff are supplied by one or more ACP States.

(c) For the delivery of supplies a 15% preference shall be taken into account in favour of manufacturing firms of the ACP States when tenders of equivalent technical and economic quality are compared. This preference shall be confined to national firms of the ACP States which provide a sufficient margin of value added.

Article 21
The Commission and the relevant authorities of the ACP States shall ensure that Articles 18 to 20 are observed for each operation and that the tender selected is economically the most advantageous, taking into account in particular the qualifications of and the guarantees offered by the tenderers’ the nature and conditions of execution of the works or supplies, and the price, utilization costs and technical value of those works or supplies. Where two tenderers are acknowledged to be equivalent on the basis of the criteria stated above, preference shall be given to the one which permits the greatest possible utilization of the physical and human resources of the ACP States.

The Commission and the relevant authorities of the ACP States shall ensure that all the selection criteria are specified in the invitation to tender dossier. The result of invitations to tender shall be published at the earliest possible date in the Official Journal of the European Communities.

Article 22
The general provisions and conditions applicable to the placing and performance of public works contracts financed by the Fund shall be subject to common rules adopted, on a proposal by the Commission, by a decision of the Council of Ministers at its second meeting following the date of entry into force of the Convention.

Article 23
Any dispute arising between the authorities of an ACP State and a contractor or supplier in the course of execution of a contract financed by the Fund shall be settled by arbitration in accordance with rules of procedure adopted by a decision of the Council of Ministers not later than its second meeting following the entry into force of the Convention.

CHAPTER 9
Drawing up, negotiation and conclusion of technical co-operation contracts

Article 24
Technical co-operation contracts shall be arranged by mutual agreement. Certain contracts may be awarded following competitive tendering, notably for important, complicated and technically difficult studies where technical, economic or financial reasons justify recourse to this procedure.

Article 25
1. For each operation of technical co-operation which will involve a mutual agreement procedure, the Commission shall compile a list of selected candidates from Member States or ACP States, selected according to criteria guaranteeing their qualifications, experience and independence and taking into account their availability for the proposed undertaking. The ACP State concerned shall choose freely the listed candidate it wishes to deal with.

2. When competitive tendering is resorted to, the list of selected candidates shall be drawn up in close collaboration with the Commission and the ACP State concerned on the basis of the criteria set out in paragraph 1 above. The contract shall be awarded to the listed candidate that submits the offer judged by the Commission and the ACP State concerned to be economically the most advantageous.

Article 26
In the context of the common rules provided for in Article 22 and the general conditions of payment established by the ACP States, the technical co-operation contracts shall be prepared, negotiated and concluded by the appropriate authorities of the ACP States in participation and agreement with the Delegate of the European Commission referred to in Article 31 (hereinafter called the “Delegate”).
Article 27

The Commission shall, as far as possible, encourage co-operation between consultants and experts of Member States and ACP States, temporary partnerships, subcontracting and the use of national experts in the teams belonging to consultants from Member States.

Article 28

When an ACP State has, within its administrative and technical staff, national personnel making up a substantial part of the work force necessary for the execution by the public works department of a technical co-operation project the Community could, in exceptional cases, contribute to the costs of the public works department by providing certain apparatus that it lacks, or supply the required additional staff in the form of experts of another State.

The participation of the Community could only cover costs incurred by supplementary measures strictly confined to the project in question and would exclude all current operational expenditure.

To this end he may participate in preparing dossiers for submission, in negotiating, with external technical assistance, contracts for studies, for the services of experts and for works supervision, in seeking ways to simplify project appraisal procedures, and in preparing general specifications and invitation to tender dossiers.

3. If it appears impossible to reduce the scale of the project or to cover the excess expenditure by drawing on national resources, the Community body responsible for taking the financing decision may, as an exceptional measure, take a decision to commit additional funds and finance the relevant expenditure either by saving made on other projects or by implementing supplementary measures worked out jointly by the Commission and the ACP State or ACP States concerned.
